National Child Measurement Programme

2019 summary of results for 135341 - Royton Hall Primary School

These results are based, where data is available, on the 2015/16, 2016/17 and 2017/18 years combined to give a sample large enough to produce reliable estimates of overweight and obesity.

Nationally, schools achieve an average participation rate of 96% in Reception and 94% in Year 6. In your school **85% of children in Reception** and **89% of children in Year 6** were measured. High participation rates (over 90%) ensure that the estimates of overweight or obese children in your school are reliable. Participation rates below 90% may result in unreliable estimates.

Proportion of **Reception** children in your school who were overweight or obese

NCMP 2015/16, 2016/17, and 2017/18 combined

The proportion of Reception children who were overweight or obese (22%) is statistically similar compared to other schools across England (22%). 22% of Reception children were overweight or obese in Oldham local authority.

Proportion of **Year 6** children in your school who were overweight or obese

NCMP 2015/16, 2016/17, and 2017/18 combined

The proportion of Year 6 children who were overweight or obese (32%) is statistically similar compared to other schools across England (34%). 36% of Year 6 children were overweight or obese in Oldham local authority.

In any population of children of all ages, it would be expected that 10% would be overweight and a further 5% would be obese. However current levels across England are far higher.

Due to rounding, figures for overweight and obesity in the text may not add up to exactly the same number shown in the chart
